Mobile WMS:
What are the options?

First to address the elephant...

UD24

Scan barcodes with BC mobile app for iOS and Android

Yes, BC Mobile app can now scan

- **Scenario 1: UI button**
- **Scenario 2: AL action**
- **Scenario 3: Barcode event**
- **All need Code to work, not out of the box**

Scenarios BC Mobile App

Scenario	Description	Device Camera	Dedicated Scanner	iOS Device	Android Device	Online	On Prem
UI Button on a field	User scans barcode by manually adding a button next to a field	✓		✓	✓	✓	✓
Invoke from AL	Based on AL code the barcode scanning is started when something happens – eg page open or user selects a custom action	✓		✓	✓		✓
Integrated Barcode scanner	Enable use of professional hardware		✓		✓		✓

BC Mobile App Scanning Demo

#02 Back to what we believe

UD 24

Products are better than custom code – it's better to take something out of the box than write it yourself

For the time being the best way to enable mobile warehouse users is Tasklet or Mobile NAV

Let's dig a little deeper

MobileNAV ERP anywhere **VS** **tasklet**

MobileNAV		tasklet
OOB, standard BC processes, but is improving	**Process Flow**	Has more purpose-built WMS process flows and auto-tailors display
Much more list & process based, but v10 is a huge improvement	**Interface**	**Purpose built for WMS, UI is very user friendly & Easy to pick up**
Works on anything, HHT Devices & Windows, IOS, Android, Virtual etc	**Hardware**	Specific list of tested HHT devices
Can easily mirror almost any BC/NAV processes on a mobile	**Dev/config**	Much harder to develop, but they are working to improve
Both have similar 5-8 days in total, depending on requirements	**Implementation**	Both have similar 5-8 days in total, depending on requirements
Basic price per user, no additional costs	**Pricing**	Higher per user price, & requires Mobicontrol License too

Product Roadmaps for this year

MobileNAV
ERP anywhere

- Improved Navigation
- Tote Picking
- Licence Plating
- Pack and ship

tasklet

- Focus on sharing code examples for easy configuration
- User Friendly App Config
- Inbound Licence plating

#03 WMS Processes demo

- Warehouse receipt & Putaway with Item tracking

- App configuration
